

INSTRUCTIONS FOR INTEGRATING BLUEORANGE E-COMMERCE GATEWAY WITH MAGENTO V2.0+

www.blueorangebank.com

STEP-BY-STEP INSTRUCTION

Compatible with Magento 2.3.x, 2.4.x versions

If your Magento version is older than 2.3, please see our installation instruction described in the **“Magento_20_21_22_support.md”** which you will find in the module root directory.

If you are using different version of Magento, install the BlueOrange E-Commerce Gateway plugin at your own risk.

1. Download zip file of Magento v2.0+ plugin: https://gateway.blueorangebank.com/ecommerce_modules/magento-v2.0+.zip
2. Create a directory **“app/code/”** (if it does not exist already) in your Magento installation root and extract the contents of the archive; after that you should have the **“app/code/SpellPayment/Magento2Module”** folder structure.
3. Create a directory **“app/code/”** (if it does not exist already) in your Magento installation root and extract the contents of the archive into it; after that you should have the **“app/code/SpellPayment/Magento2Module”** folder structure:

```
m2$ pwd
/magento2/app/code/SpellPayment
m2$ ls
Magento2Module
```

4. If needed, enable maintenance mode: **“php bin/magento maintenance:enable”**
5. Run **“php bin/magento module:enable SpellPayment_Magento2Module --clear-static-content”**

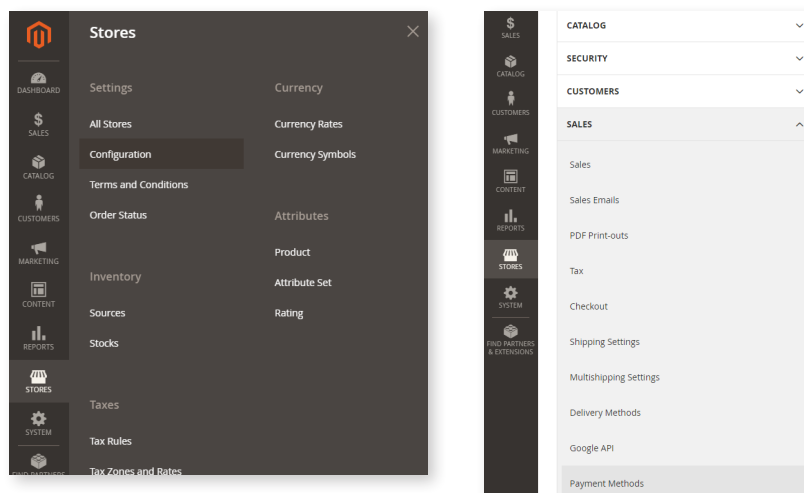

```
m2$ php bin/magento module:enable SpellPayment_Magento2Module --clear-static-content
The following modules have been enabled:
- SpellPayment_Magento2Module

To make sure that the enabled modules are properly registered, run 'setup:upgrade'.
Cache cleared successfully.
Generated classes cleared successfully. Please re-run Magento compile command
Generated static view files cleared successfully.
```

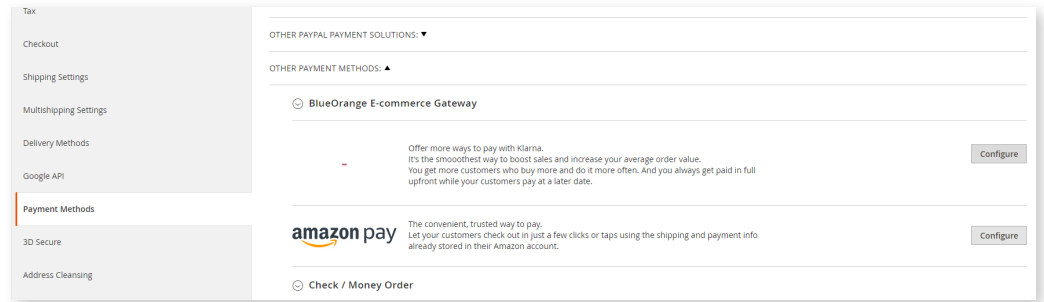

6. Run **“php bin/magento setup:upgrade”**
7. Run **“php bin/magento setup:di:compile”** if your Magento is in **“production”** mode.

```
php bin/magento setup:di:compile
Compilation was started.
Plugin list generation... 9/9 [=====] 100% 1 min 298.0 MiB
Generated code and dependency injection configuration successfully.
```

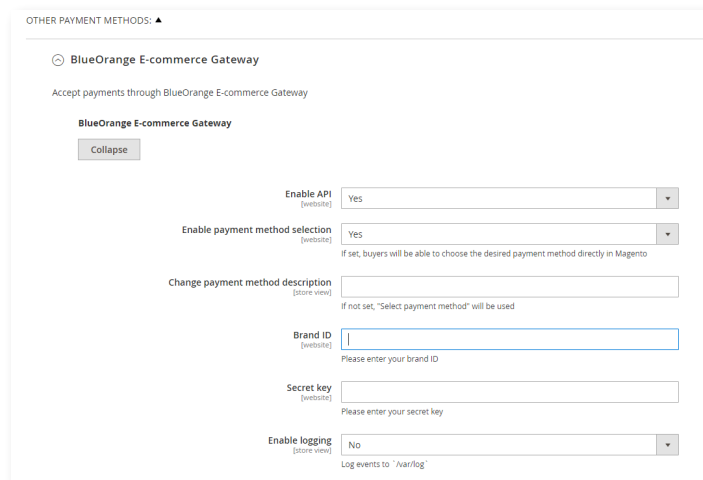

8. Run **“php bin/magento setup:static-content:deploy”** if your Magento is in **“production”** mode.
9. Clear Magento cache **“php bin/magento cache:flush”**
10. Disable maintenance mode if enabled **“php bin/magento maintenance:disable”**
11. Go to the admin page and from there go to: STORES -> Configuration -> Sales -> Payment Methods.

There you should see the **“BlueOrange E-commerce Gateway”**:

Enter the Brand ID and Secret key. You can use the **“Brand ID”** and **“Secret key”** from the Merchant's cabinet at <https://gateway.blueorangebank.com/>. After entering the values hit **“Save Config”** to save the configuration page:

12. Clear Magento cache **“php bin/magento cache:flush”** for changes to take effect.

ADDITIONAL INFORMATION

If the **“Enable payment method selection”** is set at plugin settings, the buyer at checkout will be able to select the payment method directly in the e-shop. If you want to change the text **“Select Payment Method”**, enter preferred text in the field **“Change payment method description”** at plugin settings.

If the **“Enable payment method selection”** is NOT set at plugin settings, the buyer will be able to select the payment method after redirect from the e-shop to the BlueOrange E-Commerce Gateway page. Redirect will be done after pressing **“Continue to payment”**. If you want to change the text **“Choose payment method on next page”**, enter preferred text in the field **“Change payment method title”** at plugin settings.
